Details:

Anar is going to help Bao on Android part, since there is still a problem on connecting the server with the app. Andrew has done the frame work on submitting the comments on case page, Andrew is going to make the viewer be able to reply the comment on case page. JianFeng, Dhaval has finished the part of sorting function and searching function. Milind is trying to implement the GPS coordinates into the app.

We also showed our TA what we have finished so far, and he suggested us to focus on implementing the major features such as uploading images and adding annotations on images, we explained that we are following on the priority of each user story and got the permission from our product champions.

Product Champions meeting:

Time: Tuesday Nov 26th 5:00am - 7pm

Location: MaRS

Attendance: Anar, Dhaval, Andrew, Bao, JianFeng, Klaus, Dr. Tran

Details:

We showed the finished features of the website to our product champions, which includes adding/replying comments on case page, sorting function and searching function on the table of case list. Klaus suggested to add image uploading function beside each comment, then the viewer can see the comment with scan images beside it.

For the Android part, Bao showed them how the app works, and also proved that the image could be uploaded from the mobile app, and be received and viewed on the web.

Since the product champions will not attend to our presentation on Saturday, we are going to make final demo for them and finished the extra comment requirement.
